OUR FOUNDER/SPIRITUAL HEAD

FOREWORD

The Book of 2 Peters 1:20-22 makes it clear that:

You must understand that no Prophecy or Scripture came about by the Prophets own interpretation. For Prophecy never had its origin in the will of Man but Man spoke from God as they were carried along by the Holy Spirit

This compilation of Divine Messages is another mission accomplished in service to the whole of humanity as divinely ordained.

This is a yearly publication of Divine Messages since 1994 from the INRI EVANGELICAL SPIRITUAL CHURCH under God's spiritual promptings. You have to set yourself apart and be conscious of your special status before God for the errand. God can use you at anytime anywhere for His purpose, thus you must be at alert.

***Brethren in Christ, let us draw closer to God in every respect as the book of James 1:5 put it:
If anyone of you lacks wisdom let him ask of God, who gives to all liberally and without reproach and it will be given to him.***

Prophecy is a divine gift from God to those who are in tune with Him.

Finally, as you peruse the contents of this book, I pray the Lord will not permit negative manifestations that will spoil your joy.

For over three decades, Primate Ayodele has served as a spiritual conduit, delivering God's messages to humanity in this yearly prophecy book. Each edition contains specific warnings, guidance, and spiritual insight directed to nations, leaders, institutions, and individuals. The book is deeply rooted in divine instruction, standing as a timeless voice of God for past, present, and future generations. The objective is clear, to call the world to order, warn of impending dangers, and remind humanity of divine sovereignty. This book serves as a spiritual alert system for those who heed God's voice in a world increasingly distanced from divine truth.</div><div>Warnings to the Nations was first released more than thirty years ago, born out of divine instruction and spiritual obedience. Primate Ayodele, renowned for his prophetic calling and spiritual insight, began documenting messages God revealed to him concerning individuals, institutions, and global affairs. Over the years, what started as a few pages of prophecy has grown into a powerful annual volume that thousands around the world now anticipate. Each year, the book is launched amid prayer and prophetic ceremony. The release is not simply about publication, it is a spiritual release into the world's atmosphere, hearken to a trumpet blast warning the world to listen, prepare, and obey.</div><div>Consistency is rare. Prophetic accuracy, sustained for over three decades, is nearly unheard of; Yet, Ayodele's prophetic ministry has warnings to celebrities in the world, military interventions, over and over again not only stood the test of time but has thrived under it. Political events, natural disasters, global economic changes, celebrity deaths, coups, breakthroughs, and pandemics—all have found mention in Warnings to the Nations, often months or even years before they unfold. Unlike vague predictions, Primate Ayodele's messages are clear,</div></div><div>2</div></div>

dated, and printed—an audacious move that opens him up to scrutiny, and yet, over and over again, the prophecies speak with divine truth. This accuracy has not only made headlines but has solidified the book as a prophetic authority in spiritual and secular circles alike.

This is a book that speaks to Presidents and Prime Ministers, but also to Governors, Mayors, Monarchs, and everyday people. It doesn't simply make prophecy; it proffers solutions, reveals hidden truths, and unveils divine expectations for each nation. The name Warnings to the Nations is not symbolic. It is literal. Every year, the book addresses virtually all countries in the world, giving specific insights into political, economic, spiritual, and environmental matters. The United States, the United Kingdom, China, Russia, Brazil, Nigeria, Ghana, Kenya, South Africa, Israel, Iran—no continent is left out. From the most powerful to the seemingly insignificant, every nation is given divine attention.

Whether it's a presidential election outcome, a looming natural disaster, or the rise and fall of influential personalities, the book issues clear, actionable divine signals meant to prepare, guide, or warn.

Through Warnings to the Nations, it becomes clear that no corner of the earth is outside God's focus. What governments may hide, what media may ignore, God reveals. Issues such as impending disasters, corruption in leadership, spiritual decline, political instability, terrorism, and divine judgment are addressed with pinpoint accuracy. Yet, with each warning comes a redemptive message—a way forward, a solution if only leaders and nations would heed.

In an age where prophecies are often ridiculed or viewed with suspicion, Warnings to the Nations boldly reminds the world that God still speaks, warns, and rules. The book continues to defy the norms of secularism and spiritual apathy by proving that no human

wisdom can compete with divine foresight.

Primate Ayodele remains consistent, not driven by popularity or material reward, but by obedience to the divine mandate. The success of this book is not in its sales but in its divine fulfillment, proving that when God speaks, His word does not return void. political realm features prominently in every edition. From elections to impeachment, leadership crises, diplomatic conflicts, coups, and assassinations, the book lays out divine commentary on political developments worldwide. Leaders are warned, the governments advised, and nations alerted. Many times, the book has prophesied election results even before campaigns begin.

There was a clear message sent to the government of Senegal that the Opposition was gaining ground and posed a serious challenge to the sitting President. The prophecy warned that if caution was not exercised and strategic spiritual steps were not taken, the Opposition could capitalize on public sentiments and political momentum to bring about a shift in power. This was not just a political forecast but a divine alert meant to prepare the nations leadership for what was to come.

True to the prophetic warning, Senegal's Opposition party surged forward and emerged victorious in the subsequent Presidential election. Diomaye Faye was declared winner few days after he and leader of his political party Ousmane Sonko were released from prison. The outcome shocked many observers but stood as yet another testament to the accuracy of the revelations documented in Warnings to the Nations. This fulfillment reinforces the book's relevance as more than just a spiritual manual, it is a prophetic guide that continues to shape conversations around leadership, guidance, and divine accountability in nations across the world.

Public health crises, pandemics, and even specific diseases are revealed. The outbreak of diseases like Ebola, COVID-19, and

Monkeypox were all foreseen in the book, with divine guidance provided to mitigate their impacts. Currency crashes, global economy crises, inflation, food shortages, oil prices, Stock Market shifts—all are often revealed in the prophetic text. Business tycoons, banking institutions, and Entrepreneurs have used these insights to align their strategies, recognizing the supernatural wisdom behind them. Celebrities, Music Stars, Actors, and Athletes are not left out. The book foresees the rise and fall of public figures, including victories and downfalls in major sporting events like the World Cup or the Olympics. For many, this is a reminder that fame does not exempt one from God's gaze.

Perhaps most critical is the book's bold commentary on the Church and religious institutions. God uses the book to clean His house, rebuke error, expose hypocrisy, and call His servants to repentance. Prophetic messages concerning major Denominations, False Doctrines, spiritual abuse, and Revivals are common.

Skeptics may challenge prophecy, but Warnings to the Nations has left little room for doubt. Many of its documented prophecies have become reality in chilling detail. Some notable examples include:

- The Death Of Pope Francis.
- High Rate Of Insecurity In Benin Republic.
- Burkina Faso Coup: There Was A Military Coup In Burkina Faso That Saw The End Of President Kabore's Reign. Primate Ayodele Warned Against Coup In The Prophecy Book. He Warned The Country Against Political Tension.
- The Death Of The Leader Of Hamas, A Terrorist Group In Palestine.
- Global crises like covid-19 foreseen before they occurred

These prophecies are not generalized "horoscope-style" predictions—they are detailed, specific, and often time-bound. Their fulfillments have made headlines and led to widespread acknowledgment of Primate Ayodele's prophetic credibility.

Despite the title, Warnings to the Nations is not just about foretelling doom. The heart of the book is redemptive. With every warning comes an invitation to change, to repent, to prepare, and to act. It is a book of instructions, not just predictions. Each edition is filled with spiritual directives: fasts to be undertaken, prayers to be said, actions to avoid, and strategies to implement. These are not abstract religious rituals—they are powerful tools given to nations and individuals for transformation and protection.

The book consistently reminds leaders and people alike that disobedience invites disaster, but humility invites mercy. It is a prophetic trumpet that calls nations back to righteousness, justice, and divine alignment. In many societies, especially today, prophecy is often ignored, mocked, or commercialized. But Warnings to the Nations has continually risen above the noise. Its persistence and accuracy reveal something undeniable: God still speaks, and He speaks through Primate Ayodele.

The book stands as a divine counter to human arrogance. It declares that no matter how powerful or advanced humanity becomes, God remains the Ultimate Authority. It breaks down human pride and reveals the frailty of even the strongest nations.

It is important to note that Primate Ayodele has never claimed personal credit for the contents of the book. He makes it clear: these are not his words, but God's warnings. His role is simply to listen and obey. This humility is part of what makes the book powerful—it is rooted in reverence, not ego.

What makes Warnings to the Nations enduring is not just its content but its spirit. It is not a book of yesterday—it is a book for all times. Every edition serves as a timestamp of divine communication, and each year adds to the legacy of God's ongoing relationship with His creation.

<p>As long as the world continues to turn, and as long as people are willing to listen, Warnings to the Nations will remain relevant. It is a spiritual library, a prophetic record, and a legacy of faith, obedience, and divine power.</p> <p>With each passing year, the world becomes more complex. Yet, in this complexity, God continues to offer clarity. Warnings to the Nations reminds us that God is not silent. He is speaking. He is warning. And He is calling.</p> <p>The question is: will we listen?</p> <p>Warnings to the Nations by Primate Ayodele is more than a prophecy book—it is a divine mandate. It is a voice crying out not just to churches but to Presidents, communities, industries, and nations. In a world where prophecy is often disregarded, this book continues to prove God's superiority over human intelligence, reminding us that the future is never hidden from the Creator.</p> <p>As history unfolds before our eyes, Warnings to the Nations stands as a spiritual witness, a document of truth, judgment, mercy, and hope. It is God's hand extended to the world, year after year, generation after generation.</p> <p>And still, His words keep coming to pass.</p> <p>7</p>		<p>PROPHETS PROPHECIES AND POLITICS</p> <p>In our society today, this continues to work hand in hand, just as they did in ancient times. In those days, God uses Prophets as His mouthpiece to guide the affairs of nations and ensure that leaders and people alike were steered in the right direction. Through them, God communicated His will, helping leaders make decisions that aligned with his purpose and brought peace and prosperity to the land.</p> <p>Even now, the role of Prophets remains significant. While the political arena is driven by ambition, power and strategy, Prophets offer a spiritual compass that cannot be overlooked. Their insights are meant to keep the Nations anchored in God's truth, helping to avert calamity and bring out God's blessings. Prophets serve as a bridge between heaven and earth, interpreting divine guidance to ensure that political decisions uphold righteousness and justice.</p> <p>In Genesis 40, Pharaoh had a troubling dream and God used Joseph's gift of interpretation to bring clarity and understanding. Joseph has a gift for interpreting dreams, a gift that was not based on human wisdom or sorcery but on divine revelations. If Pharaoh had not dreamed, Joseph's gift would not have been revealed at that critical time, even though Pharaoh Sorcerers and wise men could not offer a meaningful interpretation, God empowered Joseph to give an in-depth meaning to the dream that revealed His plans for Egypt and the surrounding nations.</p> <p>Prophet interference in politics is not merely about asserting influence, it is about transmitting the will and heart of God into the very fabric of human society. Prophets are chosen vessels through which divine plans and purposes are communicated to leaders and citizens alike. In their roles, they provide insight and warnings that guide political decisions and ensure that these decisions align with the heart of God.</p> <p>8</p>

For me, there is no way you can separate prophets from politics because they are an integral part of the political terrain. Every nation carries its unique dreams and challenges, and Prophets are there to bring God's perspective to these matters. Their spiritual foresight and divine counsel are essential in a world where human wisdom often falls short. Without prophetic input, a nation risks losing the moral and spiritual compass that brings Order and stability.

A Prophet's primary responsibility is to give direction on things to come and things that are yet to come. They are watchmen, sounding the alarm and revealing God's heart to the nation. If there were no Prophet in Israel, Joseph's role in interpreting Pharaoh's dream in **Genesis 41vs15** would likely have been disregarded or undervalued. Prophets have been crucial in validating God's purposes and ensuring that even those with divine gifts, like Joseph are recognized and honored in the political and social spheres of their nations.

When the people of Israel wanted to choose Saul as their king, there was great anger and division because God had not yet given his approval. It is similar to what happens in politics today, when Prophets declare that one party or candidate will win and another will lose. Such pronouncements often stir up emotions and provoke reactions, especially when people are more focused on their own Agendas than on what God is saying. This shows how prophetic words can both be powerful and controversial, especially when politics are involved.

In today's Christian world, we have lost the ability to distinguish between genuine prophecy and motivational speeches delivered by some Pastors. While both may sound encouraging and inspiring, they serve very different purposes. Prophecy is about revealing the mind and will of God, while motivational speaking often focuses on stirring emotions or boosting confidence. When we blur theses lines, we risk confusing people and leading them away from God's

true word for their lives.

We see this in the story of Jonah, who was sent by God to warn Nineveh of coming judgment in **Jonah 1:1-3**. Jonah's initial refusal to obey showed how even Prophets can struggle when faced with difficult political and social messages. Yet Jonah's experience also reveals that God's word cannot be ignored without consequence. When God truly sends a Prophet, His message is meant to bring repentance, correction and ultimately, hope.

Prophets in Israel were deeply involved in the politics of their time, offering visions and messages that shaped the destiny of the nation. Like when God sent word to king Hezekiah through the Prophet Isaiah that he would die, these prophetic words weren't about stirring emotions or causing confusion, they were about delivering divine truth. In the same way, true prophetic voices today are not about hype or popularity but about aligning the affairs of nations with the heart and will of God.

King Ahab's reign over Israel was marked by a deep conflict between political power and divine guidance. Though he ruled with Authority, his leadership was often misaligned with God's will due to his alliance with Jezebel and the worship of Baal, **1 King 17** and **18** The Prophets, especially Elijah stood as God's voice, confronting Ahab's decisions and calling the nation back to righteousness. It was through the bold declarations of the prophets that the spiritual direction of the nation was challenged and corrected, proving that kings may sit on thrones, but true Authority rest in the word of the Lord.

A nation without Prophets is like a body without a soul. Prophets are not just spiritual figures they are divine watchmen who see beyond the physical and alert the people to unseen dangers. In the days of Ahab, it was Elijah's prophetic voice that brought drought and later rain, demonstrating that national blessings and security hinged not on politics or military strength, but on obedience to

God's voice. Without the prophetic presence, a nation drifts into darkness, guided only by human wisdom, which often leads to ruin.

Security, one of the pillars of a strong nation, cannot rest solely on physical defenses. It must be anchored in divine foresight. Prophets discern the spiritual climate and warn against hidden threats. During Ahab's rule, it was through prophetic insight that battles were won or lost, not just by swords, but by the revelations. The Prophet Micaiah, for example warned Ahab of impending doom if he went to war, but Ahab ignored the warning and died in battle, **1 King 22**. This proved that true national security involves listening to those who speak for God.

Today, we may have artificial intelligence that gives surface-level data and predictions based on trends, but prophecy goes beyond that it reveals the specific will of God and pinpoints the exact timing of events. While Artificial Intelligence (AI) can analyze what is seen, the prophetic sees what is yet to manifest. Modern nations must value the prophetic voice if they are to navigate uncertainty and secure their destiny. Without it, even the most technologically advanced societies risk moving blindly into destruction.

Many nations have fallen into turmoil and destruction simply because they do not recognize the voice of true Prophets in the world. Prophets are God's Chosen Vessels, called to speak His mind and heart to the people. Their words are not just empty promises or vague predictions; they are divine instructions that can change the course of history. When Nations ignore these voices, they risk stepping outside of God's protection and guidance, ultimately leading to confusion and collapse.

It is important to understand that there is a huge difference between the true gift of prophecy and things like crystal balls or fortune-telling. While Fortune Tellers use deception and illusions to

manipulate people's fears and desires, a true Prophet receives divine revelation directly from God. The declarations of a Prophet are not based on human imagination or guesswork, they are borne out of deep spiritual connection and anointing from God Himself. This difference is crucial in a world where many are deceived by limitations or spiritual insight.

I have taken the time to read my bible from cover to cover, and one truth stands out a Prophet must be involved in the growth and development of a nation. Throughout the scripture, Prophets were always present in the affairs of their people, offering guidance, correction, and hope. They did not stand on the sidelines, but were active participants in shaping the destiny of Nations. From Moses leading Israel out of Egypt to Samuel anointing kings, Prophets have always been central to the nation's spiritual and political life. I want to make it clear that I am not here to validate or celebrate any particular person or viewpoint. My purpose is to share what I have read and understood about the role of prophecy. It is not about who gets the credit or who is popular, it is about the timeless principle that God uses prophets to directs and bless His people. This truth cannot be ignored if a nation truly desires progress and divine favor.

Prophets, Prophecies and Politics are deeply intertwined and cannot be separated in any society. Whether in ancient Israel or modern nations, the voice of God through His Prophets is essential for lasting peace, justice, and prosperity. To disregard this is to turn away from the very guidance that can bring light and hope to our communities. Let us, therefore, recognize the true prophetic voices in our time and honor the divine wisdom they bring to the world.
